

Prepayment Energy Meter

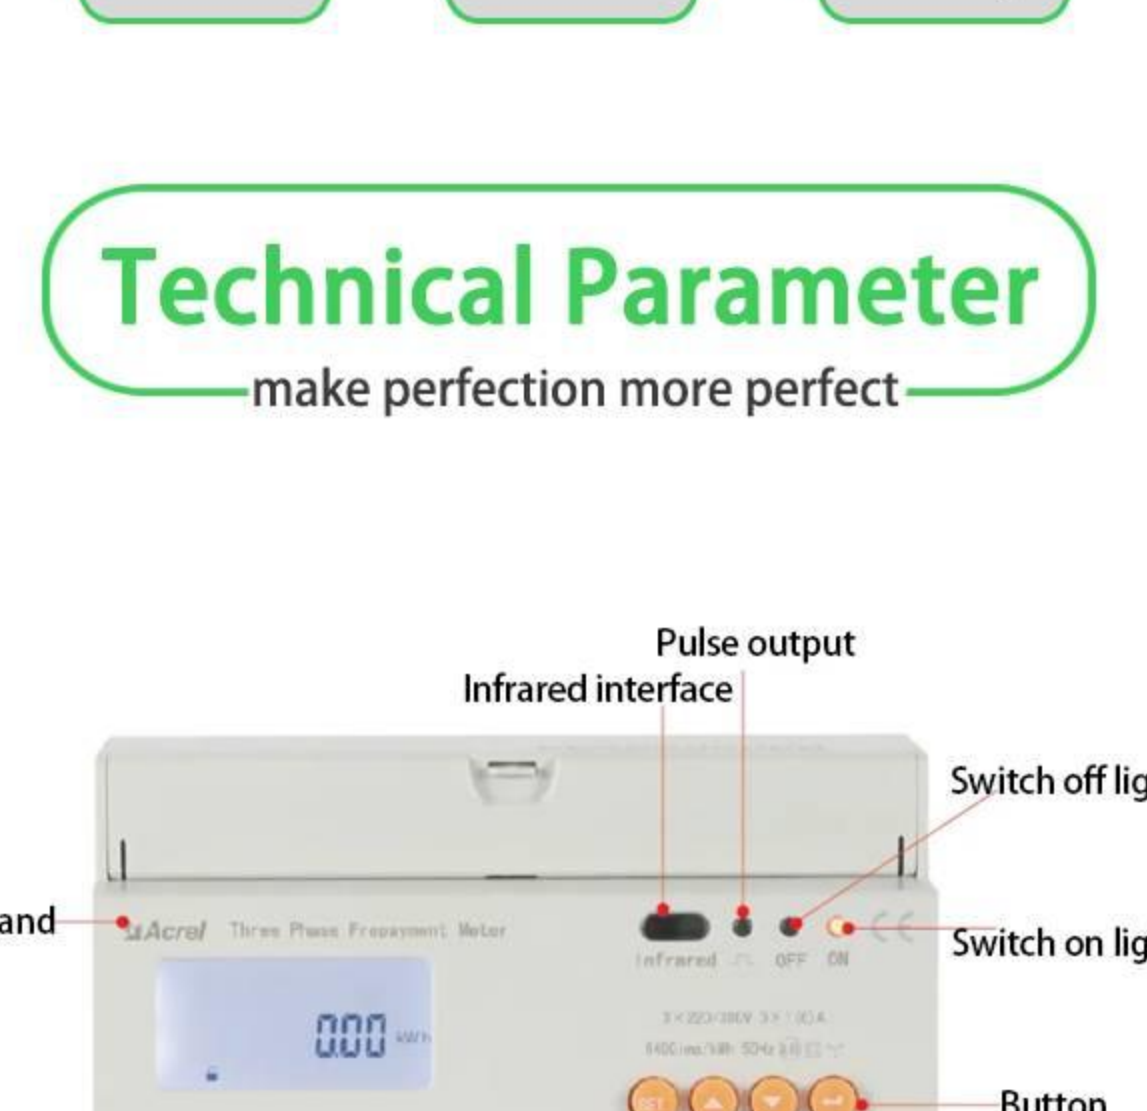

RS485 / NB / 4G networking methods for your selection

Stop maliciously defaulting on electric charge
Save the trouble of door-to-door meter reading & charging

Centralized Management of Water & Electricity Charges
One System Manages Two Kinds of Meters

Collect property fee Remote centralized meter-reading Price separately, Multi-rate tiered electricity prices

Remote selling electricity Infrared function Remote control Energy consumption inquiry and analysis

Prepayment control Malignant load control Centralized management of water & electricity

Technical Parameter

—make perfection more perfect—

✓ Reference voltage: 3*220V/380V

✓ Input current: 3*10(80)A, 3*1(6)A

✓ Accuracy: active power 0.5s, reactive power 2.0

✓ Measure all electrical parameters

✓ Infrared function, dual 485/NB/4G are optional

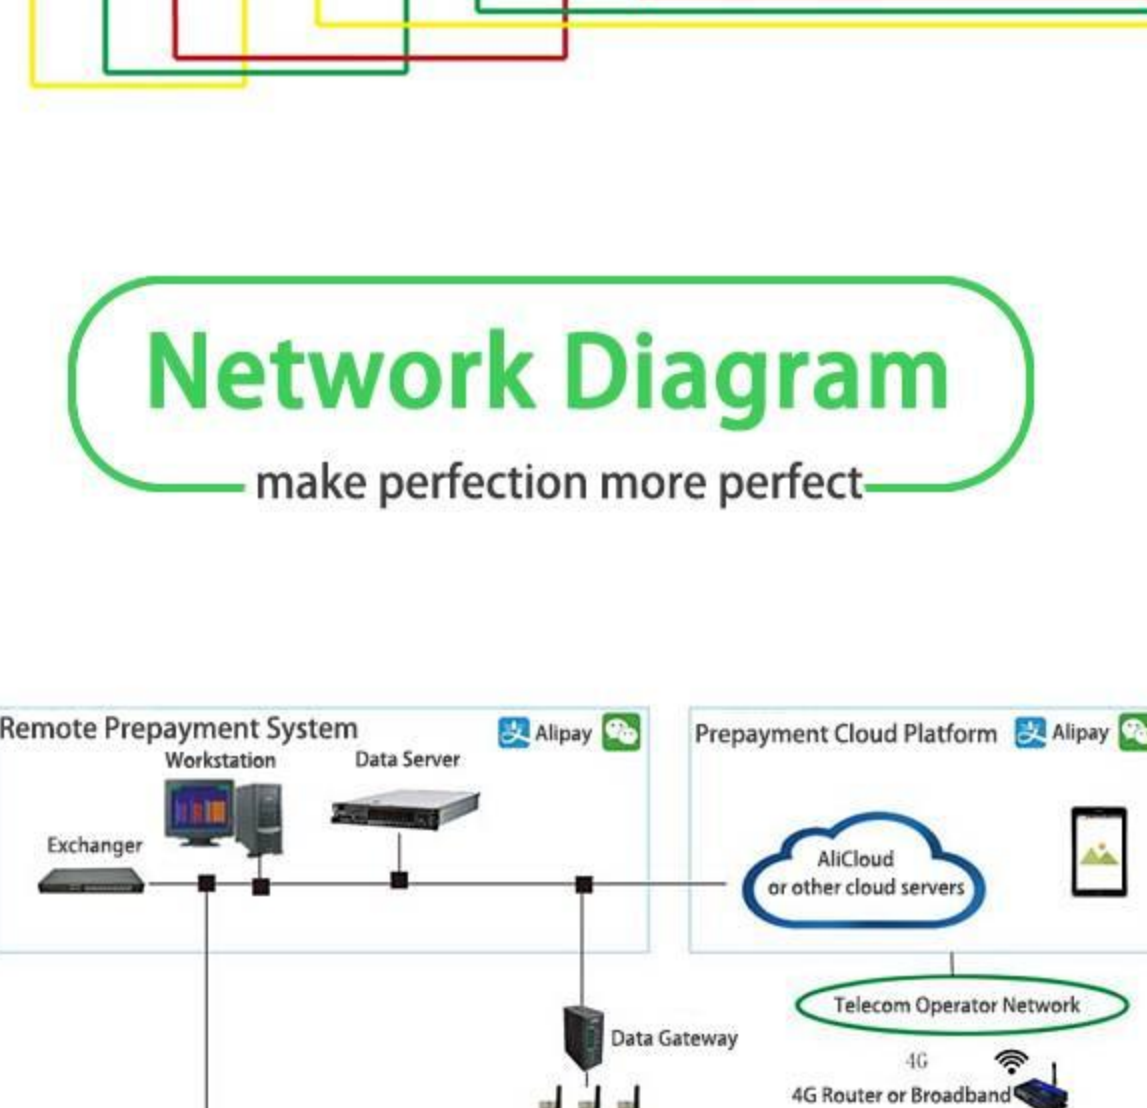

✓ Prepayment control, malignant load control

✓ History freezing, recharge records storage

✓ Support recharge by Wechat, Alipay, UnionPay

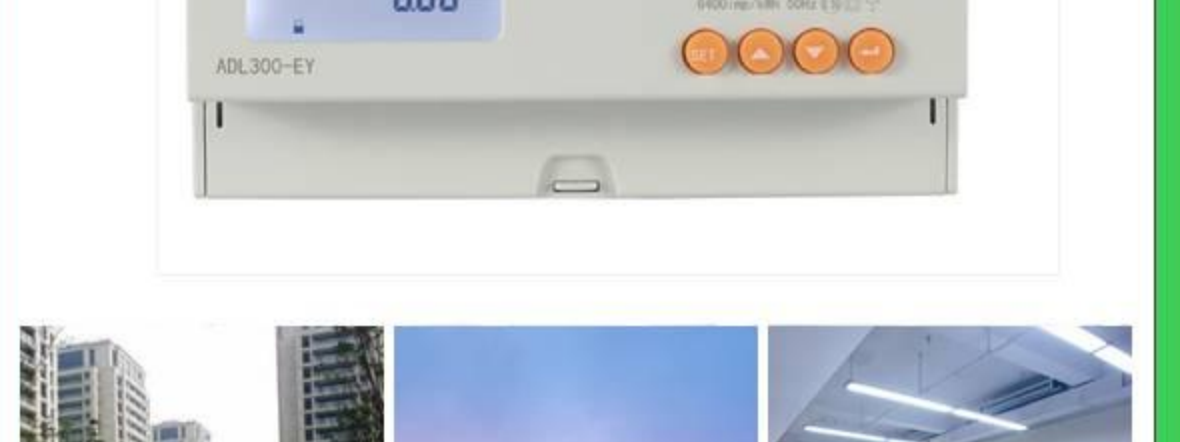

Dimension

—make perfection more perfect—

Features

—make perfection more perfect—

The whole body is made of high-density high flame retardant material ABS
Anti-aging

Anti-snooping device
Insulating connection hole is resistant to corrosion
